Farmer Education

Learn better. Farm smarter. Grow sustainably.

A simple digital learning platform for farmers

Problem Statement / Concept Title	Farmer Education – Local-Language Farming Learning Platform
Theme	Education, sustainable agriculture and rural development
Team Name	Farmer Education (replace with registered portal team name)
Team ID	Add registered Team ID
State / UT	Tamil Nadu

Team Name

Problem – Proposed Solution

Hack for Social Cause

Core problem

Farmers may struggle to find trusted, practical farming guidance in a language they understand.

Access to guidance

Expert advice and reliable information can be difficult to find.

Language barriers

Some online resources are not available in local languages.

Changing conditions

Weather, pests, soil needs and scheme updates affect decisions.

Proposed solution

A mobile-friendly learning platform with short lessons, Tamil/local-language guides, crop-care basics, weather awareness and government-scheme information.

What makes it useful

Simple, low-data pages and practical content help farmers learn at their own pace. Future versions can add expert support and weather updates.

Team Name

Technical Approach

Hack for Social Cause

Proposed technology (prototype stage)

Front end

Responsive website or mobile-friendly web app.

Content

Short text guides, illustrations and videos in Tamil/local languages.

Future integrations

Weather API and trusted expert-support channel can be added later.

Implementation process

1. Select

Choose crop, topic and language.

2. Learn

Open a short lesson or practical guide.

3. Apply

Use the guidance and check updates.

4. Improve

Collect farmer feedback and refine lessons.

Repository / demo

GitHub/GitLab link: add the working repository URL | Demo video: to be added

AI tools: usage, if any, should be disclosed by the team.

Team Name

Impact Potential

Hack for Social Cause

Better knowledge

Farmers can learn useful methods at their own pace.

Fewer avoidable losses

Timely guidance can help farmers prepare for common issues.

Sustainable farming

Encourages soil care, water saving and responsible input use.

Scheme awareness

Makes support and application information easier to find.

Target stakeholders

Farmers • Agricultural educators • Local experts • Government support services • Rural communities

SDG alignment: SDG 2 – Zero Hunger | SDG 4 – Quality Education | SDG 12 – Responsible Consumption

Feasibility and Risk Analysis

Hack for Social Cause

Feasibility

- Start with a simple website and a small set of lessons.
- Use mobile-friendly, low-data pages.
- Pilot with a small group of farmers in Tamil Nadu.

Pilot plan

1. Prepare core Tamil lessons.
2. Test with a small farmer group.
3. Gather feedback and improve the prototype.

Risks and responses

Information may be outdated

Review content regularly and show update dates.

Language may be unclear

Ask local farmers to review Tamil lessons.

Limited internet access

Keep pages lightweight; plan downloadable guides.

Expert support and live weather features can be introduced in later versions.

Team Name

Team

Team composition

Team name: add the name registered on the HSC portal

Research & content

Collect farming topics and prepare clear local-language lessons.

Prototype development

Build and test the mobile-friendly website/app.

Design & usability

Keep the interface simple for first-time users.

Testing & feedback

Coordinate pilot testing and record farmer suggestions.

Journey / challenges: the team will validate content with farmers, improve language clarity and keep the prototype easy to use.

Project information

Concept and feature descriptions are based on the Farmer Education project presentation supplied for this submission.

Links to add before submission

- Working GitHub/GitLab repository URL
- Prototype website URL, if publicly accessible
- Demo video URL, if available

Important

Do not submit placeholder links. Add only URLs that open correctly and point to the team's actual project. No external research sources were provided in the source presentation.
